

Deep Energy Retrofit Offering

Save energy, earn significant incentives and meet your organization’s sustainability goals:

- **40% greenhouse gas reduction**
- **\$1/sqft additional incentive**
- **3 years to completion**

Our Deep Energy Retrofit (DER) offering is specifically designed to help commercial customers target and upgrade buildings with significant opportunity to reduce greenhouse emissions and save energy. DER buildings will reduce greenhouse gas emissions by 40% or more through HVAC electrification, building shell or ventilation upgrades, and other tailored solutions. In addition to existing energy efficiency program incentives, your business will also receive \$1/sqft upon DER achievement.

DER provides additional support throughout the three-year period

In addition to the significant incentives and publicity, your business will receive:

- Insights into building energy use and electrification opportunities
- Technical and planning assistance, including a no-cost energy assessment and scoping study
- A clear roadmap to significant energy and greenhouse emission reductions
- Confidence that your systems are saving energy and reducing emissions through enhanced project commissioning and verification (up to \$20,000 reimbursement)

Stage	Site Energy Assessment	Technical Assessment Study	Multi-Year Implementation Plan	Years 1-3	DER Achievement
Deep Energy Retrofit Benefits	100% of Energy Assessment and Scoping Study Costs	50% of Detailed Technical Assessment Study Costs	Implementation Plan with Milestones and Verification	Check Point Meetings and Incentive Payments as Achieved	Public Recognition

Capitalize on potential tax benefits

Some improvements that are typical with Deep Energy Retrofit and energy efficiency programs may qualify for IRS 179D Energy Efficient Commercial Buildings Deduction as part of the Inflation Reduction Act.
