ENERGY STAR certified dehumidifiers use **13% less energy** than standard models.

What does an ENERGY STAR certified dehumidifier do?

- Pulls moisture from the air to discourage mold, mildew, dust mites and bacteria from growing in your home
- Removes the same amount of moisture from the air as a similarly sized non-ENERGY STAR certified unit while using less energy

Check out the buying guide at energystar.gov/products/dehumidifiers to help determine what capacity dehumidifier is best for your room's size and moisture level.
